DETAILED ACTION

Drawings

1. The informal drawings filed in this application are acceptable for examination purposes. When the application is allowed, applicant will be required to submit new formal drawings.

Specification

2. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Schumann et al., U.S. 5,732,017.

Schumann et al. teach a multi-bank Flash memory with an associated buffer to latch data and an associated processor to transfer data to and from the Flash banks, wherein data may be read out of one bank while data is written into another bank.

Note Figure 1 and the explanation thereof, especially column 3, lines 66-67.

5. Claims 1-23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Pashley et al., U.S. 6,418,506.

Pashley et al. teach a multi-bank Flash memory with an associated buffer to latch data and an associated processor to transfer data to and from the Flash banks, wherein data may be read out of one bank while data is written into another bank.

Note Figure 1 and column 4, lines 50 et seq.

6. Claims 1-23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Akaogi et al., U.S. 6,240,040 B1.

Akaogi et al. teach a multi-bank Flash memory with an associated buffer to latch data and an associated processor to transfer data to and from the Flash banks, wherein data may be read out of one bank while data is written into another bank.

Note the Abstract, Figure 1 and column 4, lines 52 et seq.

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11

Art Unit: 2186

F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 1-23 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-27 of copending Application No. 09/627,770. Although the conflicting claims are not identical, they are not patentably distinct from each other because every feature of the claims of the present invention which was either explicitly taught or would have been obvious in view of limitations of claims 1-27 of the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
